

AUT Voting Survey: who is likely to vote?

The Auckland turnout in 2013 was 35% so the 50% 'definitely intending' to vote (plus another 21% probably) and the 60% who claimed to have voted in the 2013 elections are clearly exaggerations. However, it is likely that non-votes will have similar proportions.

Voting in the earlier election was fairly strongly predictive of voting in the 2016. Those not voting in the previous general election were also not likely to vote locally (although a minority said they might)

		Column N %
How certain are you to vote in the 2016 Local Elections?	Definitely	49.7%
	Probably	21.0%
